

AUSTRALIA'S LEADING ELECTRICITY DISTRIBUTOR ACHIEVES SEAMLESS CLOUD TRANSITION AND COST SAVINGS WITH VIS GLOBAL

Summary

Industry:

Utility

Problem Statement:

Migration from Onpremise setup to Cloud whilst adding multiple new application integrations and features

Solution:

VIS team helped customer to:

- Prioritise the requirements
- Align them to the solution being implemented and how benefits will be delivered
- Break the project down to 3 phases to ensure minimal disruption to business whilst enabling use of new technology and project manager the solution delivery to success

“VIS Global’s experience in dealing with multiple technologies and partners ensured that all anticipated benefits were achieved whilst maintaining business as usual and also achieving expected cost savings.”

-A spokesperson from the utility industry

In an era where digital transformation is imperative for business sustainability, an electricity distributor of a leading utility company found itself facing the challenge of migrating from an on-premise infrastructure to the Cloud. The objective was not only to embrace the efficiency and scalability that the cloud offers but also to integrate new applications and features that would contribute to reducing overall operational costs.

The utility company was confronted with the complex task of balancing the migration to the cloud with the incorporation of new applications, all while ensuring minimal disruption to ongoing business operations. The need to manage costs and deliver anticipated benefits added an additional layer of complexity to the project.

The utility company sought the expertise of VIS Global, a seasoned technology solutions provider with a track record of successfully navigating complex technology transitions. The VIS team took a comprehensive approach to address the challenge.

CONCLUSION

The successful collaboration with VIS resulted in a seamless upgrade of the communication infrastructure, transitioning to the cloud while integrating new functionalities. The project was completed within the

specified budget and timelines, minimizing business impact and ensuring a positive impact on the overall efficiency of the insurance company's operations.
